

Diagram of Soil Horizons: 20pts

	Excellent 4pts	Good 3pts	Fair 2pts	Poor 1pt
Layers 1pt	Excellent Horizon layers were very distinct and neat	Horizon layers were mostly distinct and neat, slight mixing of layers	Horizon layers were distorted. No solid layers	Students did not complete a soil project.
Layer Characteristics 1pt	All parts of the soil horizon were described accurately with all possible soil names. (With both names ex: A horizon is the topsoil)	All parts of the soil horizon were described accurately, but only contained one name for the layer.	The student failed to accurately describe the elements of each soil layer correctly.	Students did not complete a soil horizon model.
Description of Soil 1pt	All parts of the soil horizon were described accurately with all possible soil names. (with both names ex: A horizon is the top soil)	All parts of the soil horizon were described accurately, but only contained one name for the layer.	The student failed to accurately describe the elements of each soil layer correctly.	Student did not complete a soil horizon model
Effort 1pt	The diagram clearly shows that much effort was put forth and appear complete	The diagrams look as if they lack significant effort. The diagram does not appear complete. Many errors are evident in the work.	The project looks like no effort was put into it. Very messy.	Student failed to complete a soil horizon.
Title: title, name, date, class, 1pt	Contained title of the project, and name date and class.	Contained 2-3 of the listed elements.	Contained 1 of the elements.	Student failed to complete soil horizon.
