

LAB #: 1

DATE: 6/09/2017

TITLE: Number of students in a form level.

AIM: To construct a table and a graph portraying the number of males and females in a form level.

MATERIALS: Graph sheets, Calculator, Pencil

PROCEDURES:

1. Collect the following information from one form level. (At least 3 classes).
2. Create a table and record the number of males and females in each class.
3. Represent the information using a bar graph.

Observations: Table and Graph

Discussion: What are graphs and their importance? Descriptions of results,

Sources of errors: list at least two

Conclusion: answer the aim of the lab

Reflection: applied to life.
