Lab#: 2

DATE: 8/10/2018

TITLE: Classification of species of the Animal kingdom

AIM: To classify species of animals using the binomial nomenclature system.

MATERIALS/APPARATUS:

- Lap top or Tablet

- Internet

PROCEDURES:

1. Obtain 10 organisms from the specimen's shelf.
2. Observe the specimens carefully.
3. Use a lap top or personal tablet to find the taxonomy of the organisms.
4. Record names of species in a table form.

OBSERVATIONS:

TITLE:

Example

Taxa	LION	BEAR	Parrot	Angel fish	?	?			
Phylum									
Class									
Order									
Family									
Genus									
Species									

Discussion:

1.aWhat is classification?

b.The importance of classifying organisms?

2. Observations: From the structures, what can you say about the sort of place where it lives.

3. Conclusion

4. Reflection
